NEW FILM, THE BABY ANIMALS

"WILD IMMERSION"

DIVE INTO THE FIRST VIRTUAL RESERVE

Do you dream of travelling around the world to encounter the "Big Five": lions, elephants, leopards, buffalo and rhinoceros? **It's possible** while limiting your carbon footprint **and without leaving Paris!** Come and discover the "Wild Immersion" at the Jardin d'Acclimatation!

Thanks to this **new attraction**, the park's 41st, from one film to the next, you will cross 5 continents to encounter **—in 360° virtual reality—** the fauna and flora of each of the world's regions. In the Amazon, the equatorial forest's hidden animals. In Asia or Oceania, pandas and whale sharks. In the African savannah, giraffes, zebra and herds of elephants.

From the Bois de Boulogne, go off and explore the planet, hot lands and cold seas, jungles or deserts. **Observe nature** as you have never before seen it, to **preserve biodiversity, with the ethnologist and climatologist Jane Goodall.** The technology will transport you in a unique experience: **see here, a stone's throw from where you live,** the big cats, the migratory birds and our planet's large mammals at home.
